Camilo Henriquez

Full-Stack Engineer · AI Tooling

contact@camilohenriquez.com | Honduras · Remote | camilohenriquez.com | github.com/hnkatze | linkedin.com/in/hnkatze

Full-Stack Engineer with 4+ years of experience. Currently focused on frontend and mobile development at CIT (Angular, Next.js, Astro, Lit Element, Flutter) for enterprise projects. In parallel, as a freelance full-stack engineer, I've architected a municipal government platform with a 130+ endpoint NestJS API. Author of three open source MCP servers for integrating AI assistants into developer workflows.

TECHNICAL SKILLS

EXPERT

React · Next.js · TypeScript · NestJS · Tailwind CSS · JavaScript · HTML & CSS · Git

PROFICIENT

Angular (v17–v21) · Astro · Lit Element · Flutter · PostgreSQL · Docker · GitHub Actions · Firebase · Jest / Vitest · Playwright · Vercel / Railway

FAMILIAR

Go · C# · AWS

AI-AUGMENTED WORKFLOW

Assistants: Claude Code, GitHub Copilot, Gemini

MCP Servers: Author of 3 open source MCP servers (Go, TypeScript)

Methodology: Spec-Driven Development, critical validation of AI outputs

EDUCATION

Computer Science Engineering — In Progress
CEUTEC · Honduras

Bilingual University Technician — Completed
CEUTEC · Honduras

LANGUAGES

Spanish	Native
English	Intermediate (B1)

CERTIFICATIONS

AWS S3	AWS Skill Builder · 2025
Flutter	Udemy · 2024
Docker	Platzi · 2023
JavaScript	Udemy · 2022
HTML & CSS	Udemy · 2022

PROFESSIONAL EXPERIENCE

Associate Developer
Jul 2024 — Present

Creative Information Technologies (CIT)

Frontend and mobile development for high-impact enterprise projects under NDA. Stack: Angular (v17–v21), Next.js, Astro, Lit Element, and Flutter.

- Web development with Angular v17 to v21 using signals, standalone components, deferrable views, and OnPush strategy in production apps
- Mobile development with Flutter + Dart, clean architecture, and Riverpod state management
- Unit and e2e testing with Jest, Vitest, and Playwright; strict TypeScript across the codebase
- Collaboration in agile, cross-functional teams with strict code review practices

Freelance Full-Stack Developer
2021 — Present

Self-Employed · International clients

End-to-end web solutions for international clients. Frontend (React, Next.js, Astro, Angular), backend (Node.js, NestJS), and deployment.

- Architected a municipal government platform: NestJS REST API with 130+ endpoints, PostgreSQL + PostGIS, serving 5 frontends (4 Angular 21 apps + 1 Astro portal)
- Delivered 25+ projects with 100% client satisfaction: NGOs, e-commerce, service businesses, and developer tools
- Built CI/CD pipelines with GitHub Actions, multi-stage Docker builds, and deployments on Railway, Vercel, and Firebase
- Authored open source tools: Swagger Extractor MCP (Go), PrimeNG MCP Server (TypeScript), FetchMate HTTP library

KEY PROJECTS

Swagger Extractor MCP — Go · Open Source
MCP server that exposes OpenAPI/Swagger operations as tools for AI assistants like Claude Code and GitHub Copilot

PrimeNG MCP Server — TypeScript · Open Source
MCP server that provides PrimeNG component documentation to AI assistants; 70+ Angular components with examples and usage guidance

Municipal Government Platform — NestJS · PostgreSQL · Angular
Full-stack platform for a municipal government: NestJS API with 130+ endpoints, PostgreSQL + PostGIS, serving 4 Angular 21 apps and 1 Astro portal

Swagger Extractor — Next.js · TypeScript
Browser-based developer tool to upload OpenAPI specs, filter endpoints, test live, and export in JSON or LLM-optimized TOON format

FetchMate — TypeScript · Open Source
Lightweight TypeScript HTTP library with strong typing, interceptors, automatic retry, and error handling
